• Invitation to take a Government Relations survey to aid in the development of documents to be published later this year.

• Visit ISAO.org to take the survey.

• The Government Relations working group has been charged to engage with State, Local, Tribal, and Territorial (SLTT) governments and regional organizations to evaluate the cybersecurity information sharing landscape.

• This two-part survey aims to identify current cybersecurity information sharing capabilities of regional and SLTT entities and information needs that may exist between SLTT government, the federal government, regional entities and ISAOs.
• The ISAO SO is currently seeking new members to work on the development of
documents and products related to Information Sharing Analysis.

• The Analysis Working Group will be focused on developing documents to address
these and other issues:
  • Define the ability of an ISAO to perform analysis on member information that is shared
  within the ISAO and on information shared from external sources.
  • Some ISAOs will have strong analytical capabilities but others likely will be limited to sharing
  and will lack analysis capabilities. Define a process that will accommodate this disparity.
  • Prescribe the level of analysis (e.g. network traffic, malware, mitigation action) to be done by
  ISAOs.
    • Introductory and Intermediate Analysis guidelines for new, emerging and established ISAOs

• Apply to be part of Working Group 7 Leadership (Vice-Chair), a core
development team, or a general member on ISAO.org

• Chair: Rick Holland (rick.holland@digitalshadows.com)
