## **Acknowledgements**

This publication was developed by the Information Sharing and Analysis Organization Standards Organization (ISAO SO) with representatives from the private, professional, and government communities in an ongoing effort to produce a unified voluntary set of guidelines and guidance for information sharing. The ISAO SO and the Working Group leadership are listed below.

### ***ISAO Standards Organization***

Dr. Gregory B. White

*ISAO SO—Executive Director*

Richard Lipsey,  
*ISAO SO—Deputy Director*

Brian Engle  
*Executive Director*  
*Retail Cyber Intelligence Sharing Center*

### ***Working Group Four—Privacy and Security***

David Turetsky  
*Partner*  
*Akin Gump Strauss Hauer & Feld LLP*

Carl Anderson  
*Vice President*  
*Van Scoyoc Associates*

Norma Krayem  
*Senior Policy Advisor*  
*Holland and Knight LLP*

The ISAO SO leadership would also like to acknowledge those individuals who contributed significantly in the development of these guidelines:

## 4 **1 PREFACE**

5

6 In September 2016, the Information Sharing and Analysis Organization Stand-  
7 ards Organization published ISAO 300.1: [Introduction to Information Sharing](#).  
8 Section 9, Information Privacy, included core and supporting principles for con-  
9 sideration by entities in establishing an ISAO. This document supplements that  
10 high level guidance to further assist entities as they assess the potential privacy  
11 implications of cybersecurity information sharing. It builds upon the core and sup-  
12 porting principles by outlining actions to promote efficient and effective infor-  
13 mation sharing while minimizing the impact on privacy interests. This document  
14 is not intended to create baseline requirements for regulatory or enforcement ac-  
15 tion. It is consistent with the [Cybersecurity Information Sharing Act of 2015](#)  
16 (CISA), draws upon the U.S. Departments of Homeland Security and Justice  
17 [Guidance](#) to Assist Non-Federal Entities to Share Cyber Threat Indicators and  
18 Defensive Measures with Federal Entities, and makes additional suggestions to  
19 advance privacy and facilitate robust information sharing.

## 20 **2 GUIDING PRACTICES**

21

22 1. Establish and implement written policies that identify the types of cyberse-  
23 curity information shared within and by an organization, how it will be  
24 used, retained, and shared, and with whom it will be shared. Issues for  
25 policy consideration may include: cybersecurity information collection, use,  
26 access, receipt, retention, dissemination, minimization, and disposal. Cy-  
27 bersecurity information could include information necessary to deter or  
28 protect against a cybersecurity threat such as indicators of compromise;  
29 threat actor tactics, techniques, and procedures; and malicious code.

30

31 2. Disclose, retain, and use information shared for a cybersecurity purpose  
32 only for cybersecurity purposes, as defined by CISA.

33

34 3. Remove or redact information that is known at the time of sharing to be in-  
35 formation of a specific individual or that identifies a specific individual be-  
36 fore sharing cybersecurity information, unless it relates directly to the  
37 detection, prevention, or mitigation of a cybersecurity threat.

38

39 4. As soon practicable, securely dispose of, de-identify, or anonymize infor-  
40 mation that is known at the time of sharing to identify a specific individual

- 41 or is of a specific individual obtained through a cybersecurity program  
42 when such information is not directly related to a cybersecurity threat.
- 43
- 44 5. Promptly notify a submitter or originator of information shared for a cyber-  
45 security purpose that is not cybersecurity information.
- 46
- 47 6. Update cybersecurity information repositories upon receipt of a notice of  
48 information erroneously identified as cybersecurity information and se-  
49 curely return, dispose of, de-identify, and/or anonymize any such infor-  
50 mation.
- 51
- 52 7. Use tools such as the [Traffic Light Protocol](#) or similar approaches to desig-  
53 nate sensitive cybersecurity information and govern its sharing within and  
54 among organizations.
- 55
- 56 8. Apply to cybersecurity information appropriate protection from unauthor-  
57 ized access or acquisition.
- 58
- 59 9. Regularly review cybersecurity information to ensure it remains useful for  
60 cybersecurity purposes.
- 61
- 62 10. Regularly review the receipt, retention, dissemination, and use of cyberse-  
63 curity information for consistency with these practices and associated or-  
64 ganizational policies.
- 65
- 66 11. Consistent with organizational privacy policies, provide appropriate trans-  
67 parency about cybersecurity information sharing practices and potential  
68 partners, including notice that information that identifies a specific individ-  
69 ual may be shared outside the organization for “cybersecurity purposes,”  
70 including with the government, which may result in the government’s use  
71 of the information for purposes authorized under CISA.
